COATS OF ARMS, &c.

No. 3.

Royal Arms of Great Britain and Ireland,
applied shield, flags, and details.
Plain painted 66/ each.
Painted in proper heraldic colours 115/ ,,
Size, 22½ in. high × 29½ in. wide.

No. 4.

Royal Arms of Great Britain and Ireland.
Plain painted 36/ each.
Painted in proper colours .. 71/ ,,
Size, 14½ in. high × 18½ in. wide.
A smaller pattern.
Size 8½ in. high × 11½ in. wide.
Plain painted 7/6 each.
Painted in proper colours .. 11/6 ,,

No. 3a.

Royal Arms of Great Britain and Ireland,
applied shield and details.
Plain painted 55/ each.
Painted in proper heraldic colours 105/ ,,
Size, 22½ in. high × 22 in. wide.

No. 2.

Royal Arms of Great Britain and Ireland, applied shield, crown, and details throughout,
on heavy moulded base.
Plain painted 168/ each.
Painted in proper heraldic colours 315/ ,,
Size 47 in. high × 61 in. wide at base.

No. 1.

Royal Arms of Great Britain and Ireland, applied flags, shield, crown, and details
throughout, on heavy moulded base.
Plain painted 210/ e
Painted in proper heraldic colours 380/ ,,
Size, 60 in. high × 61 in. wide at base × 79 in. wide across flags.

COATS OF ARMS, &c.

No. 6.

Prince of Wales' plume, with laurel wreath and ribbon.

Plain painted	42/ each.
Bronzed	62/ ..
Painted in proper colours ..	92/ ..

Size, 38½ in. high x 27 in. wide.

No. 8.

Panel of Royal Arms.

Plain painted	31/6 each.
Painted in proper colours ..	66/6 ..
Bronzed	36/6 ..
Electro Bronzed	51/6 ..

Size, 22 in. diameter.

No. 5.

Prince of Wales' plume, with laurel wreath and ribbon.

Plain painted	120/ each.
Bronzed	145/ ..
Painted in proper colours ..	190/ ..

Size, 66 in. high x 54 in. wide.

No. 7.

Prince of Wales' plume and motto.

Plain painted	21/ each.
Bronzed	28/6 ..
Painted in proper colours ..	48/ ..

Size, 21 in. high x 20 in. wide.

No. 9.

Panel of National Flowers.

Painted	21/ each
Bronzed	26/ ..
Electro Bronzed	41/ ..

Size, 19 in. diameter.

SECTION III.

CONTAINING

GARDEN AND PARK EMBELLISHMENTS.

FOUNTAINS AND BASINS, VASES AND PEDESTALS.

GARDEN CHAIRS, SEATS, AND BENCHES.

FLOWER STANDS AND CONSERVATORY FITTINGS.

STATUES, FIGURES, AND ORNAMENTAL OBJECTS.

GARDEN ROLLERS, &c., &c.

The other Sections comprising Catalogue are—

SEC. I.—REGISTER STOVE GRATES AND SHAMS, &c.; DOG GRATES, FIRE DOGS, AND LEAMINGTON BARS; CHIMNEY-PIECES; MANTEL SHAMS AND REGISTERS; FENDERS; ASHES-PANS; FIRE-IRON RESTS; &c., &c.

SEC. II.—HALL FURNITURE IN IRON, VIZ., TABLES, HALL STANDS AND CHAIRS, HAT STANDS, UMBRELLA STANDS, MIRRORS, SCRAPERS, DOOR PORTERS, KNOCKERS, &c., &c.

SEC. IV.—RANGES AND KITCHENERS OF ALL DESCRIPTIONS; STEAMING APPARATUS; PATENT CIRCULAR RANGES, &c.; WROUGHT BOILERS AND FITTINGS; YORKSHIRE GRATES; RUMFORD AND SHAM STOVES; OVENS; HOT-AIR STOVES; GILL STOVES; GAS STOVES; LAUNDRY STOVES; &c., &c.

End of Volume I.

SEC. V.—GAS PILLARS OF ALL KINDS; GAS STANDARDS; CANDELABRA AND GAS-LAMP FIGURE STANDS; GAS BRACKETS, FITTINGS, &c.; COLUMNS, CANTILEVERS, AND BRACKETS; DRINKING FOUNTAINS AND FITTINGS; COATS OF ARMS; SCHOOL FURNITURE; AND CONSTRUCTIONAL IRON-WORK AND MONUMENTAL ERECTIONS; &c., &c.

SEC. VI.—FENCE WORK OF ALL KINDS; ENTRANCE GATES, HAND GATES, AND PIERS FOR SAME, IN WROUGHT AND CAST-IRON, AND IN WROUGHT-IRON, WITH CAST AND MALLEABLE ENRICHMENTS, WITH RAILING TO MATCH: TOMBS, TOMB-PLATES, AND TOMB RAILING; INTERIOR AND ALTAR RAILING; PALISADE RAILING; CRESTING, FRIEZES, PANELS, AND GRATINGS; CONSERVATORIES; SHOP FRONTS; VERANDAHS, BALCONIES, AND WINDOW GUARDS; STAIRCASES (STRAIGHT AND CIRCULAR), BALUSTERS, AND RAMPED RAILINGS FOR SAME; FINIALS, &c.; PATENT TWISTED METAL, IN GATES, RAILINGS, BALUSTERS, VERANDAHS; &c., &c.

SEC. VII.—RAIN-WATER GOODS; HOT-WATER APPARATUS; BOILERS, PIPES, AND FITTINGS; COIL CASES, &c.; PROVED FLANGE AND SOCKET PIPES; &c., &c.

SEC. VIII.—PUMPS OF ALL KINDS, EXCEPT STEAM PUMPS; WINDOW FRAMES; STABLE FITTINGS; WHEELBARROWS; AGRICULTURAL AND OTHER IMPLEMENTS; CATTLE TROUGHS, PIG TROUGHS, AND OTHER FEEDING TROUGHS; &c., &c.

SEC. IX.—FURNACES, POTS, BOILERS, KETTLES, AND HOLLOWWARE; PANS, VARIOUS; SAD IRONS, &c.; AXLES, BUSHES, WAGON SLIPPERS, FORGE BACKS, AND OTHER SMITHS' UTENSILS; SINK TRAPS; VENTILATORS; &c., &c.

SUPPLEMENTARY SECTIONS NOT INCLUDED IN CATALOGUE.

SEC. X.—COLONIAL CASTINGS AND GOODS FOR EXPORT.

SEC. XI.—STEAM ENGINES AND MACHINERY AND CASTINGS CONNECTED THEREWITH.

SEC. XII.—TERRA COTTA AND BRICK MANUFACTURES.

SECTION III.

FOUNTAINS.—The following designs of Fountains are arranged, as far as possible, to suit all requirements, so that in making choice of a Fountain, the principal considerations are, the space at disposal and the water supply.

Given sufficient of these two, the purchase and erection of a Fountain may be arranged to suit almost any proposed expenditure. The water supply from the water-works of large towns reduces this latter consideration to a minimum, as no calculation is here necessary—the usual pressure being fully sufficient for all purposes; but in places where there are not water-works, then the situation of the reservoir, and consequently the amount of fall to the Fountain obtainable, will have to serve as a guide in the selection of the design. A minimum fall of 12 to 14 feet (reckoning from the difference in level of the jet of Fountain and that of the reservoir) is necessary for the proper action of a Fountain with a jet, *i.e.*, to force water to a height. Where, however, this fall cannot be obtained, Fountains similarly fitted to Nos. 7, 8, and 9, page 280, are best; and, although not able to force water to a great height, on account of the deficient head, have yet a very good effect.

THE TANK OR RESERVOIR will, of course, vary according to circumstances. For a small Fountain in a conservatory or garden, a tank fixed in the upper part of the house will be sufficient, provided the house be not at too great a distance—the nearer, in reason, the reservoir is to the Fountain, the better. For a large Fountain, a reservoir may be formed on some sufficiently elevated ground contiguous. Where necessary these reservoirs may be filled with water by various kinds of pumps, worked by wind, water, or steam-power or horse-power. For Pumps suitable, see Sec. VIII.

THE SUPPLY PIPES from the tank or from the reservoir should be of as large a size as conveniently can be arranged, or graduated in size from the reservoir (the largest end) to the Fountain (smallest end), and all acute angles should be carefully avoided. Of course where the head of water is considerable—say over 30 or 40 feet—these conditions are not so necessary. And for Fountains in towns, erected near to the company's mains, the difficulties provided for are not likely to arise. For Pipes and Fittings, see Sec. VII.

Some of the designs, as Nos. 46, 47, and 48, are specially suitable for forming a centre to a lake or ornamental pond. The rock-work represented in each case can be formed of stone, or can be imitated in cast-iron. In smaller, similar situations, some of the separate figures shown at pages 285 and 286 may be used with advantage.

JETS.—The jets are all of brass, and are made of various kinds. A Sheet of Illustrations will be forwarded on application. It is desirable, in a Fountain of any considerable size, to have a variety of jets which are interchangeable.

In cases of *strictly* MONUMENTAL FOUNTAINS, as No. 37, or the "Cromwell" Fountain, as made for the International Exhibition, 1862, the statue, forming, as it does in each case, the feature of the erection, can be varied to suit altered circumstances; and this has been done with good effect with No. 37—the figure of "Ceres" being replaced by one of a personal character, and the shields being "charged" with proper arms, &c., the central column and constructional portion being retained as in the drawing. The Fountain, as shown, was made for the Chilian Government, and has since been altered (as described above) for other situations in India and elsewhere. Estimates will be furnished on application for Fountains to special designs, or special designs and (if necessary) sketch models will be supplied.

DRINKING FOUNTAINS are not dealt with in this Section; they will be found in Sec. V.

GROUND BASINS may be formed in one piece (when not larger than 10 feet diameter), see page 316. For larger sizes they are made in

sections and jointed at flanges; the cement and caulking tools being sent with the Basins. In many cases it is desirable that the Basin itself be formed of brick or concrete, and in this case cast-iron rims are provided, of various widths and diameters, and to various patterns. In those at page 318 an architectural effect is aimed at, and the rims are fitted together in pieces.

As regards size, the ground basin should of course be larger than the largest basin of Fountain, say 3 or 4 feet larger; but where practicable a greater diameter is desirable. It will be observed that in the cast-iron basins shown a substantial pedestal is formed in the centre for the Fountain to rest upon, and at the same time the dead capacity of the basin is diminished, whilst the appearance remains the same—an obvious advantage in hot climates or where there is a scarcity of water.

THE FIXING of Fountains should not be a matter of any difficulty, since all Fountains are sent out complete in themselves as regards pipes and fittings within the structure, and with one jet in each place (alternative ones can be supplied if required). Workmen can be sent if desired, to undertake or superintend the erection. The castings for convenience of carriage are taken to pieces, but each part is intelligibly numbered, and where necessary a drawing or plan is sent to assist the mason or workmen. Naturally the ground basin should be the first consideration; and this having been placed in position, and the supply pipe from reservoir turned up by means of an elbow, to be level with the *top* of pedestal formed by centre of basin, the base of fountain may then be lifted on, and the pipes within the Fountain connected with the supply pipe; and then the structural parts of Fountain may be placed on one after the other, care being taken to keep each of the basins entirely level by means of a spirit level and wedges underneath base, as otherwise the water drips unevenly, and has a bad appearance. The overflow may be taken off laterally at any point below the rim of the basin—say 2 in. below—or a vertical pipe may be fixed in basin, the top of which should be 2 in. below rim, and greater in diameter than the supply pipe,—either of these pipes communicating with some drain.

PAINTING OR BRONZING Fountains is respectively included in the prices quoted, and for smaller and middle-size Fountains this can readily and successfully be done *before* they leave the works. In the case, however, of large Fountains, it is recommended that the bronzing or decoration be done *after* it is fixed. There will be an extra charge made if this be so done by our workmen, varying according to circumstances, all the prices being arranged as for their being finished and bronzed, or painted, *before* leaving the works.

STATUES.—The Statues and Figures shown in the following pages are only intended as representative illustrations and as likely subjects for repetition; but we are always open to submit special designs or sketch models for Statues, Busts, Figures, &c., having established relations with some of the leading sculptors for carrying out their own models, or for executing models on our behalf for special purposes. They can be executed in cast-iron, well bronzed (in the case of small articles *electro* bronzed) or in real bronze metal stained.

A special book of small bronzes and ornamental castings, from models by distinguished artists, in iron and bronze, is issued on application.

VASES.—A great variety of these, with or without pedestals, are shown, most of which are adapted for outdoor as well as for indoor situations; but the finish should vary according to situation—if painted white or cream for outdoors they look well, and some patterns look well bronzed; whilst Vases, as 8, 10, 24, 12A, 18, 35, 37, 38, &c., &c., may be electro bronzed or partially so. The pedestals may be varied in many cases and with advantage.

FLOWER STANDS.—These are generally placed under cover, and are therefore bronzed in accordance. The CONSERVATORY STANDS, pages 337 and 344, are representative only; they can be made to almost any size or shape, and prices will be quoted on receipt of plan for either design.

GARDEN CHAIRS.—The increasing use of Iron Garden Seats has led to the introduction of a number of new designs. For this country wooden seats are generally preferred to iron, and are more suitable, and in most of the newer patterns the staves are fitted in an iron frame, thus forming the seat entire; and while stronger and more convenient for packing, the trouble of fixing each stave separately is avoided. For hot climates, however, metal staves have to take the place of the wooden ones, and these are secured in a similar manner for the bottom or seat. Designs can be submitted and special estimates furnished for any large number of Chairs for public parks or grounds, and coats of arms, &c., may be introduced as required. The Hall Chairs at pages 273 and 274 belong perhaps more properly to Sec. II., being for indoor purposes.

GARDEN ROLLS.—We have recently introduced an improved pattern (No. 4), which will be found to possess many advantages. Orders for these and for Garden Chairs should reach us as early in the year as possible, in order that they may be ready for delivery in March and April.

Fountain 14 ft high, consisting of lower basin 9 ft. diameter, supported on base with four heavy crosses, &c., middle stalk supporting a smaller basin 4 ft. 6 in. diameter, and a top basin 2 ft. 6 in. diameter, with a central jet of water. Complete, fitted with brass jetting, &c., &c. For ground basins, see also pages 315 and 316.

40.

Fountain 13 ft. 6 in. high, consisting of lower basin 8 ft. diameter, supported by massive base, middle stalk surrounded by four stalks with canes, &c., supporting a smaller basin, 3 ft. 9 in. diameter, the whole surmounted by a globe and a cross.

on steel, with all the fittings fitted ready for erection, lapped and varnished

L

on steel, with all the fittings fitted ready for erection, lapped and varnished

L

in other ground basins and risers, see pages 315 and 318

The above fountain can be varied by removing the top basin, and substituting the middle basin and figure of "Boy and Serpent" from No. 30, page 297, making the stalk with dolphins

1 ft. high, lapped and varnished

L

Then varied the design becomes No. 30

40.

Fountain 13 ft. 6 in. high, consisting of lower basin 8 ft. diameter, supported by massive base, middle stalk surrounded by four storks with rushes, &c., supporting a smaller basin, 3 ft. 9 in. diameter; the whole surmounted by swans and a finial.

Complete, with brass jets and fittings fitted ready for erection, bronzed and varnished	£
Rim for ground basin (N), 16 ft. 0 in. diameter, for concrete basin	£

For other ground basins and rims, see pages 315 and 318.

The above fountain can be varied by removing the top basin, swans, and finial, and substituting the middle basin and figure of "Boy and Serpent" from No. 39, page 297, omitting the intervening stalk with dolphins.

11 ft. high, bronzed, &c., as-above £

Thus varied the design becomes No. 30.

41.

Fountain about 20 ft. 4 in. high, consisting of lower basin 10 ft. diameter, with applied ornamentation, supported by octagonal base, surrounded by four Naiads 4 ft. 5 in. high, &c., resting on plain, moulded, octagonal plinth; a smaller basin 5 ft. 9 in. diameter, supported by octagon stalk, surrounded by four herons, with reeds, &c.; the whole surmounted by finial composed of reeds and leaves, &c.

Complete, with brass jets and fittings fitted ready for erection, bronzed and varnished £

Rims for concrete ground basins, see pages 315 and 318.

This fountain may be varied by the substitution of quatrefoil-shaped basins of same sizes as the round ones shown; and instead of the finial composed of reeds, to consist of a heron with stretched-up neck on rockwork, forming jet; in other particulars same as drawing.

20 ft. 4 in. high, bronzed, &c. £

Thus varied the design becomes No. 33.

N.B.—Dolphins, as No. 38, may be substituted for the Naiads in either of these fountains, viz., No. 41 or 33, reducing price of fountain £

Fountain about 20 ft. 4 in. high, consisting of lower basin 10 ft. diameter, with sixuple ornamental, stepped, $\frac{1}{2}$ in. high, and 4 in. wide, four dolphins, &c., resting on plain, rounded, octagonal plinth, a smaller basin 5 ft. 9 in. diameter, supported by octagon stalk, surrounded by four herons, with reeds, &c.; the whole surmounted by India composed of rocks and leaves, &c.

complete, with brass jets and fittings fitted ready for erection, brued and varnished.

rooms for concrete ground basins, see pages 315 and 318.

by some sleep as the removal of the stomach; and instead of the final removal of the stomach, the removal of the stomach is not a necessary removal and in other particulars some as drawing.

20 ft 4 in high, brownish, etc.

There varied the design between No. 51

N.B.—Animals, at No. 41, may be substituted for the dolphins in either of these formulas, viz., No. 38 or 51, increasing the price of fountain £

38.

Fountain about 20 ft. 4 in. high, consisting of lower basin 10 ft. diameter, with applied ornamentation, supported by octagonal base, surrounded by four dolphins, &c., resting on plain, moulded, octagonal plinth; a smaller

This fountain may be varied by the substitution of quatrefoil-shaped basins of same sizes as the round ones shown; and instead of the finial composed of reeds, to consist of a heron with stretched-up neck on rockwork, forming jet; in other particulars same as drawing.

37.

Monumental fountain 34 ft. high, consisting of massive Cornelian column standing upon a base 12 ft. square, on which are four life-size figures of Naiads on square pedestals, forming buttresses to the column; the column fitted with four massive gas-brackets, with cast-iron lamp-frames, glazed, with shields intervening; the whole surmounted by a statue of "Ceres," 6 ft. high.

Complete, with brass jets and fittings, bronzed and varnished
Painted white or stone colour, and varnished

For ground basins and runs, see pages 315 and 318.

This fountain may be varied by the substitution of another figure on top. (See Statues, pages 349 @ 356). The shields between bracket can also be charged with arms or other device as may be required.

[illegible]

of Kings in more peaceful, widely intervening

Complete, with brass pins and fittings, grommets and varnished
 Primer white or stone colour, and varnished.

For ground between and runs, we pay 315 and 318.

This formula may be copied by the substitution of another figure for \log . (See 3. 4. 344 (p. 355). The details between \log and \log are also the same as in the other cases.
